(a)

Observation/solver restrictions apply; stationary sensitivities require a smooth isolated root.

(b)

Required dependencies

Julia standard libraries

LinearAlgebra, Random

External packages

Distributions, ForwardDiff
SpecialFunctions

Optional extensions

Optimization

Optim

Stationary solving

NonlinearSolve

External ODE integration

SciMLBase + solver

Continuous sensitivities

SciMLBase, SciMLSensitivity, ReverseDiff

Posterior sampling

AdvancedHMC, MCMCDiagnosticTools

Development tools

Docs and verification

Documenter, Aqua, JET

Figure generation

Python, NumPy, Matplotlib
Pillow, PyMuPDF
